

Celebrating the successes of Cleveland District State High School's graduates

Lindsay McLaughlin *Business Administration*

After leaving CDSHS in 2000, Lindsay studied a Bachelor of Business (Economics) at Queensland University of Technology, graduating in 2003. After university Lindsay spent a year teaching English in Japan and, even though she was a year behind others starting 'real' work, does not regret taking the opportunity to travel and work overseas.

When Lindsay returned to Australia she worked in a graduate program for a supply chain and logistics company, rotating through various positions in the business. She then joined the procurement team at Rio Tinto in Brisbane and was responsible for negotiating contracts and buying all materials and services that Rio Tinto uses across its operations.

Over the last eight years Lindsay has moved to a few different roles within Rio Tinto in Australia, Canada and Singapore. She also went back to university and completed a Masters of Business Administration. She lives in Singapore but frequently travels to the USA, Canada and Australia for work.

CELEBRATING SUCCESS
across school and community
