

Celebrating the successes of Cleveland District State High School's graduates

Daniel Tuckwood

Science and Engineering

From a young age, Daniel has had two passions: building things and performing music. His years at CDSHS were distinguished by international music exchanges, where he performed on clarinet and saxophone in Japan and across Europe. At the same time, he worked hard in school for his second passion, science.

Daniel graduated from CDSHS in 2008 and commenced studying a Bachelor of Electrical Engineering at QUT. He is now an Electrical Engineer and travels across Australia for design and auditing tasks covering a wide variety of sectors including the mining, water treatment, commercial, industrial and services industries.

Daniel has been a member of the Queensland State Emergency Service since 2009 and is now a Deputy Group Leader. He has worked through the 2011 Brisbane Floods, Cyclone Yasi, Ex-Cyclone Oswald and the 2014 Stradbroke Island fires and has received accolades for deployments. Daniel still enjoys regularly performing on saxophone in a jazz band.

CELEBRATING SUCCESS
across school and community
